

Design Project 2

Evaluation for the BingeBuddies app: Enhancing group decision-making and online viewing of video contents.

Participant goal: We need to evaluate our app BingeBuddies and we search for participants to test it and help us to improve our app. Your goal as a participant will be to try the app and follow some steps in a group setting and then answer a questionnaire that will show us the global effectiveness and limitations of our prototype.

Type of participant:

We search for:

- People who regularly participate in group movie-watching sessions.
- Young people (between 18-30 years old).
- People who have issues in group decision making in content selection.
- English speaker

If you correspond to those criteria you are welcome to participate in our test.

Data collection:

We will collect some data during and after the test:

- Group name
- Decision-making time
- Number of voting rounds
- Number of errors
- Survey answers

Those data will be completely anonymous and kept on our personal computer only.

Procedure:

After a quick introduction on the purpose of the app and its main features, you will be asked to carry out several actions as a group. To do this test you can use one of our computers or your personal computer. We will send you a link to create an account and then we will start the test. First we will choose randomly a participant who will create the group and the vote.

Here is the list of the actions to carry out:

- Create a group (for the chosen participant)
- Send an invitation (for the chosen participant)
- Create a vote (for the chosen participant)
- Join a vote
- Vote
- Use the super dislike

- Get ready to watch the movie
- Send a message
- Press pause/play
- Quit the video content

After the test is done you will be asked to answer a questionnaire to measure your understanding of the app and collect your suggestions. This questionnaire is a Google form that will be sent to you.

Retraction:

If you want you can at any time stop the test and retract from the study by contacting one of the team members. If you retract we will delete your data from the study, from our computers and delete your account in the prototype.
